

MAISON DESIGN+BUILD

We work with our clients to find the best location for their home.

Site selection is the most important step in starting your build. Whether you want a lot in one of Saskatoon's beautiful new areas, are looking for the ideal infill site within a mature neighbourhood, or want the perfect acreage site for your country lifestyle - we can help.

The following maps show land that Maison Design+Build currently has for sale. These lots have been carefully selected for their prime location and excellent development opportunities.

We also work with an established real estate network and Saskatoon and area's land developers to offer lots in new subdivisions, acreages and prime infill locations.
